Hon. J. G. Coates, Prime Minister of New Zealand, is the second Dominion Premier to visit Canada on his way home. He is scheduled to arrive in Montreal this week.

LEGAL NOTICE

MORTGAGE SALE OF FARM PROPERTY

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by The Land Titles Act under a certain mortgage which will be produced at the time of the sale, there will be offered for sale by public auction at the Post Office in the Village of Oyen in the Province of Alberta, on Saturday the 12th day of February 1927, at the hour of Two o'clock in the afternoon, the following property, namely:

The North Half of Section 34, in Township 28 and Range 4, West of the 1st Meridian in Alberta, containing to the Crown all mines and minerals. Terms of sale to be Twenty per cent cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserved bid free from all encumbrances save taxes for the year 1926.

The vendor is informed that the above property is situated about 8 miles South of Oyen on the C.N.R. and that there are situated thereon a dwelling 14 ft. by 32 ft., with addition 9 ft. by 12 ft., 2 stables 30 ft. by 42 ft. and 14 ft. by 28 ft., a hen house and a well house, about 4 miles of fencing and that about 100 acres have been cultivated but not worked lately.

For further particulars and conditions of sale, apply to Thomas Lees, Oyen, Alberta.
DATED this 3rd day of December, A.D. 1926.

Approved: "W. M. Peel", Registrar.

After an emergency operation and ten days in hospital, Mr. John Klyn returned to his home in the Cappon district.

MAY BE PROGRESSIVE WHIP
J. W. Whitfield, N.P.T. for North Ontario, who will probably occupy the vacant post of Whip for the Progressives in the Ontario Legislature.

Third Community

Luncheon

The third community luncheon of the season was held last Saturday in the Alberta Hotel, when about 70 farmers, business men and ladies were present.

Following the luncheon, the chairman, Dr. Swartzlander, introduced the speaker for the day, Mr. Andrew Anderson, who gave a most instructive and entertaining address on "Farm Management", and at the conclusion of same, was given a great ovation.

After Mr. Anderson's address, the matter of a permanent agency for the organization was discussed, and "The Oyen District Builders Association" was made a unanimous choice. The final arranging of a constitution was left to a committee of 18.

Next month, the luncheon will be held on the second Saturday (February 12).

May is Elected to School Board

A more satisfactory attendance than in past years was noticeable at the annual general meeting of ratepayers of Oyen School District, held last Friday afternoon, in the School.

The financial returns and trustees' report were well received. The matter of publishing annually, the financial statement, and the lack of a fire escape, was brought to the notice of the trustees, and will be given their attention.

Mr. S. A. Miller, whose term had expired, was re-elected to office, and Mr. D. E. May, was elected to the board of trustees in place of Mr. C. S. Wright, who has resigned after many years faithful service.

Sibbald Hockey Team Win at Oyen

The Sibbald hockey team were Oyen visitors last Thursday, when they played the local boys in a friendly game, winning by a score of 6-1.

Clive Raddell, one of the Oyen players, had his eyelid painfully cut with the puck, and had to receive treatment at the hospital, which necessitated stitches. (Ed. note: His condition is rapidly improving and he can still throw a wicked rock, in spite of it.)

Louis Gillespie, former "hot water bottle king", arrived home last Sunday on a visit to his parents.

"THE COUNTRY BEYOND"

Mrs. Thomas Thompson left last Sunday for Calgary.

Mr. Arthur Anderson is spending a few days with his parents at Stanmore.

Miller Winning at Rosetown

S. A. Miller is the first to venture forth this year in search of "jewellery" at one of the severest bonspiels to be held on the

Goose Lake Line. Accompanied by Charles Stewart, Art Johnson and Allan Sharp, he left on Tuesday morning's train for Rosetown. Reports to hand this morning are most satisfactory. The rink has played two games and won both. Strangely enough he played Miller of Saskatoon and Miller of Rosetown, so as the p.d. sagely remarked: "Well, Miller just had to win—and that's that."

The Growth Of Motor Travel Responsible For Greater Interest Now Taken In National Parks

The 1926 summer season witnessed the establishment of new records in the number of persons visiting the Canadian National parks.

While this increase has been general, it has been most noticeable in the motor or motor travel. Advances made in the automobile industry and in the construction of good roads have brought corresponding advances in the growth of motor travel, until this traffic has become of great importance in the development of the country.

Highways play an important part in drawing a large number of the tourists who visit Banff and Kootenay National parks by motor. Through the Kananaskis gateway, which is the eastern entrance to the Banff park, and the Red Deer gateway, which is the western entrance to the Kootenay park, there passes each year the greater part of the motor traffic to the Canadian parks in the Rockies.

The volume of travel which poured into these two parks by motor is shown by the registration. At the Kananaskis gateway at the end of October of this year 1926 more cars had been registered as incoming: at Red Deer Hot Springs gateway, 6,535 entries were recorded, making a total of 21,682 cars entering the two parks. This number shows an increase of 5,536 over the number recorded in 1925.

Waterton Lakes National Park, in Southern Alberta on the International boundary, drew an amount of tourist travel far in excess of the previous year. The possibilities of this scenic wonderland are accentuated by the plans for extensive development announced in 1926.

The opening in June, 1925, of the motor road extension from Lake Louise to Banff, helped to make Waterton Park for the first time into prominence in the motor tourist world. The further extension of this road, which will enable motorists to proceed through Golden, is expected to be opened to travel early in 1927.

Jasper National Park, in the northern part of Alberta, had most successful season, nearly 7,900 hotel registrations having been recorded prior to the end of the year.

The National Buffalo Park at Waterton, Alta., drew more visitors than in former years. A large increase is being taken in all countries, particularly in Canada and the United States, in the efforts of the Canadian Government to preserve the buffalo and also in the experiments that are being conducted at Buffalo Park in cross-breeding.

Alberta Fur Production

Beaver Trapping Is Now Permitted Under Certain Restrictions

Two million dollars and something over represents the money value of Alberta's fur production for the year 1925-1926, according to Provincial statistics. The exact figure is \$1,722,710 as against \$1,540,000 the year before. Beaver trapping is now permitted, under an order-in-council just issued, through the upper part of the province, north of the 50th parallel. Within these bounds the close season, which now holds for the whole province and for the whole year, will be opened for four months, January 1 to April 26.

Saskatchewan Aerial Service Government Geologists to Make Intensive Investigation of Northern Area

An aerial survey of Northern Saskatchewan is to be made, preliminary to an intensive investigation of the region by Government geologists. The privately constructed airplanes will be used and a three-year programme of mapping the country has been announced. The work is being undertaken as an aid to mineral development. Gasoline and general supply stations are being set up at convenient intervals.

Agriculture on the Up Grade

Agricultural progress in Saskatchewan is on the upgrade. During the past few months land sales have been brisk, half of the purchases being for new, unbroken ground. Wholesale importers of the province all look for a big year of farm production in 1927. The important feature of the year is that he has now more orders for spring delivery than the total of his 1926 sales.

In September 2,465,500 pounds of fish, valued at \$110,000, were landed on the coasts of northern Ireland.

Present a small boy with a watch and he'll have the time of his life.

W. N. A. 164

Alberta Oil Field

Three Big Wells Now Piped on Producing Basis

Three big wells in the Turner Valley oil field near Calgary, are now on a producing basis. They are now the largest No. 4 with 500 barrels of asphalt and 21,000,000 cubic feet of natural gas daily, the well with 120 to 140 barrels of asphalt and 6,000,000 to 10,000,000 cubic feet of gas and the third with an estimated flow of 100 barrels of asphalt and 6,000,000 cubic feet of gas. The Turner Valley is installing a small separator and is piping the gas to the Imperial plant in the field. It is the newest well to "come in." Apparently, half a dozen other wells are close to the reported production stage.

Saskatchewan Financial Status

Rural Municipality Collections Show a Good Increase Saskatchewan's financial status is healthier than for many years, back to the rural municipalities tax collections show an increase of 5.5 per cent over those of the preceding year—fully two-thirds of the increase in taxes for the year being realized in cash. This is the highest percentage of tax collections recorded in rural municipalities during the past 14 years. Tax collections in cities, towns and villages are also distinctly prompt.

"Ideal Fashions"

The Fashionable

Develop Refractor Industry

Development of an extensive lumber industry on the plains of the Mackenzie River basin is believed to be started by the formation of the Dominion Refractor Co., Ltd., a company capitalized at \$500,000, with headquarters at Vancouver, according to the Morning Sun.

During the first four months of last year 179 persons were killed and 6,615 injured in traffic accidents in London.

Model School Is Started

Children of Wembley Hill Learn Under Ideal Conditions

The last word in elementary schools—Wembley Hill Council School, High Road, Wembley, was formally opened a few days ago by Sir Percy Jackson, chairman of the West Riding of Yorkshire Education Committee.

Lucky children, Wembley Hill. They go to a school in which Middlesex Education Committee have done for them, furniture, health and happiness.

There are spray baths where every child can have a bath once a week; the children are in little cubicles ranged round the wall, and then step on to "duckbaths" under the warm spray. No child has a bath until the consent of the parents has been given.

An unusual feature of Wembley Hill, which is a mixed school of boys and girls, is that it is directed by a woman, Miss A. J. Hayor. A remarkable personality, she has been successful at other schools and it is clear that she is getting distinctive "atmosphere" at Wembley. The school is divided into "houses" on the public school model.

There is little discipline of the old-fashioned kind. The word "punishment" is not known in the school. Miss A. C. Evans, head-mistress of the junior school, strongly objects to the word.

"What we aim at here," she says, "is to get everything possible out of the child rather than to force everything possible into him. The more giving of information is not education."

Wealth Of British Columbia

Basic Industries Will Have Output This Year Valued at More Than a Quarter of a Billion Dollars

British Columbia's basic industries will have an output this year valued at considerably more than a quarter of a billion dollars. This represents an enormous increase over the figure of five or ten years ago and indicates that industrial progress in Canada's Pacific coast province is maintaining an almost phenomenal stride. The estimate of the value of the year's production by industries is as follows: lumbering and related forest industries, \$80,000,000; mining, \$75,000,000; agriculture, \$70,000,000; fisheries, \$24,000,000; and pulp and paper, \$15,000,000. In ten years there has been an increase of 100 per cent in the lumber industry; manufacturing has advanced 214 per cent; and in the volume of lumber export has been 800 per cent; and farming has gained 75 per cent.

Final Crop Estimates

Final estimates of the Northwest Grain Dealers' Association place the wheat crop of the three Prairie Provinces at 37,131,600 bushels. Oats are set at 110,500,000; barley at 4,500,000; rye, 8,700,000, and flax 5,610,000.

Friend—"So you've invented a parachute and intend to test it out your self? What if it doesn't work?" Inventor—"It'll improve it until it does. If it takes ten years!"

Saskatchewan Poultry Pool

Twenty-five Carloads of Dressed Birds Were Handled

Announcement of the final payments on the Saskatchewan poultry pool, in which 28 carloads of dressed birds were handled, yielded returns totaling \$143,803.15 to the producers, were announced by the Saskatchewan Poultry Pool following the meeting of the directors.

Cheques will be prepared immediately, and the payments will be sent out on or before the 15th inst.

Turkeys—Specials, 25 cents a pound; No. 1, 22 cents; No. 2, 20 cents.

Chickens—Specials, 23 cents a pound; No. 1, 21 cents; No. 2, 17 cents. Poultry—No. 1, 18 cents; No. 2, 14 cents.

Ducks—No. 1, 16 cents; No. 2, 11 cents.

Geese—No. 1, 16 cents; No. 2, 11 cents.

George Brighty, general manager of the pool, pointed out that all shipments were made at flat rates on a quality basis. Light birds being paid for at the same rate as heavy birds, if they had the necessary quality to ship.

A large percentage of the birds shipped by the pool graded special and No. 1. Mr. Brighty attributed this to proper feeding and killing, and pointed out that the provincial department of agriculture did considerable work throughout the province in demonstrating proper methods of killing and dressing. "This undoubtedly resulted in the producers' quick advance of this business, and at work getting bigger returns than they would otherwise have secured," added Mr. Brighty.

The satisfactory prices obtained in the 1926 poultry pool will have its effect on the growth of the poultry industry in the province, several districts waiting up to the possibilities of the industry.

Paper From Straw

Wrapping Paper and Cardboard to be Manufactured at Edmonton Plant

Newspaper from straw will not be turned out by the Edmonton plant now being installed. In the initial stages, Wrapping paper, cardboard and other coarse papers will be manufactured. Moving in vast developments it is planned to establish plants in other western cities. The Alberta Government is interested in this enterprise and has favored extensive experiments, conducted to a successful finish, by Dr. Duane Wigg, who was connected for a considerable time with the Dominion Government's paper-straw plant in the McGill University grounds, Montreal.

When a Migration comes, a few Lemmings, canner than the rest, Mr. Wells says, or somewhere outside the common sense, refuse to go on the last journey. These curl up into

hardly living balls of fat and, after a while, they sleep under the snow, eventually find their way up into the mountains. Thus the race is preserved from absolute extinction.

"We start for the north, the sea, nothing can stop them. To keep themselves fit for their fate, they fast four times their own weight in food every day. Moving in vast herds over the fields, they devour every blade of grass, every herb, every tuft of moss. Moving in vast herds over the fields, they devour every blade of grass, every herb, every tuft of moss. Moving in vast herds over the fields, they devour every blade of grass, every herb, every tuft of moss.

They fight the cattle and the reindeer for their forage, and the cattle cannot stand against them. In the Norwegian villages they have a saying: 'The cattle are coming here, that means the Lemmings are passing by.' They climb mountains, swim rivers, jump ravines.

And when the Lemmings come at last to the sea, what do they do? The leader plunges in, and the millions plunge in after him, and he is seen on and on till they can see no more and drown. Dr. Grenfell, of Labrador, saw a column of Lemmings about a mile long, still swimming towards their strange doom.

Why do the Lemmings do these things? Nobody knows. But Mr. Wells will tell you that in the north country the old people will say: 'They are going to find the last continent of Atlantis!'

Preference Given To English

Has Supplanted French as Official Language of Soviets

English has supplanted French as the official foreign language of the Soviet government. From George Trevelyan, the Soviet foreign minister, down to the humblest clerk, almost everybody in the Soviet foreign office speaks and writes English. In some of the universities English is a compulsory subject, while in several government departments it is an absolute prerequisite to employment.

English has also superseded German in popularity among the masses, and it now is taught in nearly all the schools, in special classes organized by the government, in workers' clubs and elsewhere.

Members of the old nobility and aristocracy need never lack remuneration and comfortable living if they know the English language. Thousands of them are engaged as teachers and interpreters. Most government documents now are issued in Russian and English. The only ruling guide-book on Soviet Russia, published by the state, is issued in the English language.

The Marquis of Anglesley

Another name has been added to the already long list of titled Englishmen who have invaded the land and in development enterprises in Alberta. It is that of the Marquis of Anglesley, Charles Henry Alexander Paget.

He is interested himself in the quest for oil in the Yukon Valley, near Calgary.

Unless a man has some knowledge of figures he can't count.

Envisions The Time When Western Grain Will Go To Europe By Northern Route

Capture Queer Animals For American Museum

Odd Manners and Customs of Lemmings Told by Noted Explorer

The Lemmings of Norway were stopping at the Waldorf Astoria hotel, New York. Strange things were told about them, but the Lemmings did not mind at all, for they are dead. More over, they left immediately to spend the next thousand years or so in a man at the Museum of Natural History.

To learn of the curious behavior of these Lemmings, and their odd manners and customs, a man does not have to wait until the next time they come. He can find out about them in the book "The Lemmings" by the explorer who found them in the Malay jungle and has now brought over from the north country these Lemmings, and creatures, the first of their family ever seen in America. The Lemmings are known as "mystery" animals.

Scarcely five inches long, rather like spotted guinea pigs in appearance, they live in a singular circle which every day they make.

The Lemmings were taken on November 10, during their periodic migration to the sea. These migrations occur at intervals, and when one ended the Lemmings vanish altogether until the scheduled time for the next arrivals. In Norway the great trek of the Lemmings is made every 23 years. If you make them then, you will have a long time to wait.

When a migration comes, a few Lemmings, canner than the rest, Mr. Wells says, or somewhere outside the common sense, refuse to go on the last journey. These curl up into

hardly living balls of fat and, after a while, they sleep under the snow, eventually find their way up into the mountains. Thus the race is preserved from absolute extinction.

"We start for the north, the sea, nothing can stop them. To keep themselves fit for their fate, they fast four times their own weight in food every day. Thudon Bay harbor are the finest in the world

Thudon Bay harbor are the finest in the world. Thudon Bay is a small bay on the coast of the St. Lawrence from Montreal to the sea, said Capt. Robert A. Bartlett, famous Arctic explorer, in an interview in Chicago.

Captain Bartlett, who was a member of Peary's North Pole expedition, mentioned this when the grade, not only of Canada's prime provinces, but of the Northwestern United States, will go to European countries by the northern outlet with a great assembly point in Saskatchewan, probably at Saskatoon.

For four or five months of the year Hudson Strait is the safest body of water to navigation in the world," he stated. "There is no danger of perpetual daylight; there are no fog or ice as we encounter in the St. Lawrence."

"Why doesn't Canada wake up and finish the Hudson Bay route and provide an outlet for products that will save Canadian railways millions in freight charges? I can tell you it is because of political opposition in industrial Ontario and Quebec. I don't know any real reason why you would not go to the Hudson Strait."

Captain Bartlett mentioned a plan, hitherto unannounced, for a dirigible service via the "top of the world," between Europe, Canada, and the American cities to the Orient with ships flying over the Arctic wastes.

With this purpose in mind, he is preparing to make two Arctic voyages, by air and land. In this he expects to receive aid from the United States or Canadian Government. Selection of suitable landing fields, one or more of which would be in Western Canada, is his next business.

"The British navy would police the Pacific and the American fleet the Pacific. English-speaking races need never fear Oriental world domination," he said.

Captain Bartlett is a survivor of the "Iceberg" era. He is a Newfoundland by birth, descended from a long line of navigators and explorers.

W. D. MORRELL

About Town and Country

Mr. Joe Long had the misfortune to break a bone in his left foot last Friday, when he dropped a heavy weight upon it. Mr. John Love is meanwhile doing the draying for Mr. Long.

Car of High Grade Lump Coal, on track this week. There is no better coal on the market. Get your supply now. W. V. Miller, Coal Dealer.

Rev. Father Boltz of Rockyford, Alta., was a visitor at Sacred Heart Rectory last Wednesday and Thursday. On Thursday evening, as the guest of Mr. and Mrs. J. J. Kelly, Father Boltz, who is recognized throughout Alberta as a pianist of the highest rank, delighted a number of Oyen citizens by his superb rendering of several of the classics. This accomplished musician has agreed to return to Oyen to give a recital on St. Patrick's night, March 17. Those who had the privilege of hearing him will assure you that a great treat is in store for all lovers of good music.

The Young People's Club invaded the home of Mr. and Mrs. W. L. Irvine last Friday night, their visit being in the nature of a charivari to the newlyweds. Following a mock wedding, which was amusingly staged, the hostess and host were presented with a tray and sherry glasses. The evening was pleasantly spent at cards and after the party had done justice to the refreshments, the party broke up singing. "They are jolly good fellows."

Mr. Charles Tuel, who has been a patient for the past five weeks in Oyen Hospital, left on this morning's train for Gleichen, accompanied by councillor James Lees.

Mrs. L. Nichol left for Saskatoon Sanatorium last Sunday, when she was accompanied by her three children and her brother-in-law, Mr. E. Affleck.

Miss Annie Martz, of Sibbald, who underwent an operation in Oyen Hospital some time ago, was permitted to leave for her home last Monday.

The Young People's club will hold a dance in the Masonic Hall on Friday evening next, commencing sharp at 9 o'clock.

Mr. Ole Peterson was discharged from hospital to-day.

Miss A. McLean, late of Holy Cross Hospital, Calgary, arrived in Oyen last Saturday, and commenced duties on the staff at Oyen General Hospital.

Mr. G. A. Bennett of Calgary, who is doing well after his recent operation, expects to return home in a few days.

In Lighter Vein

Police Chief: "Do you mean to say this fellow choked a woman to death in a cabaret in front of 200 people, and nobody interfered?"

Cap: "Yes, Cap, everybody thought 'he was dancin'."

Art: "I'm going up to the jail. I want to talk to the bandit who took my Ford."

Andy: "What's the big idea?"

Art: "I want to find out how he got 50 miles an hour out of her."

Paste This on Your Windshield

Stop and let the train go by. It only takes a minute. Your car will start again, in fact, And better still—you're in it.

Banff Putting on Brilliant Carnival

(1) Ice palace on Banff main street during Carnival. (2) Merry Circus. Queens of the Carnival. (3) Ice-heating is popular at Lake Minnewanka nearby. (4) A typical dog-draw race.

ing the carnival. The scenery setting has not its equal in the world.

What Quebec City means to the east for its winter sports, Banff means to the west. Calgary recently abandoned her winter carnival to join forces with the mountain resort. Instead of going to sleep for the winter like the bears that roam the nearby mountains, Banff keeps awake and with the coming of the snow takes on a new lease of life. Visitors come from every part of the world. For palaces are built and the town takes on a gay and festive appearance. The inset shows the Carnival Queen, Miss Mary Cross.

The championship dog-draw to "The Top of the World and Back" will be an outstanding event of the carnival. This event has become annual and provides the longest and most thrilling dog race in the world, being 173 miles in length and exceeding the famous Pas Derby by 23 miles. The handsome Strathgairn trophy and substantial cash prizes attract the most expert dog-men on the continent.

The finest and most picturesque toboggan slide in the Dominion is in operation at Banff this season. It is located high up on the side of Sulphur mountain and the start can readily be reached by motor car. Situated but a short distance from the curling club and skating rink, visitors will be able to alternate between these amusements.

LEATHER GOODS

Having taken over the business formerly conducted by Mr. Thos. Thompson I beg to announce that I am now occupying my new premises.

I am here to give service—and respectfully solicit your business, which at all times will have my careful attention.

When you need anything made of leather or harness hardware see me.

J. B. LOWE
